

```
class A {
    AccountDao accountDao;
    void m1() {
        accountDao = new AccountJpaDaoImpl();
        account = accountDao.findAccount(1);
    }
}
```

```
interface AccountDao {
    int findAccount(int accountNo);
}

class AccountDaoImpl implements AccountDao {
    int findAccount(int accountNo) {
        // hibernate code
        return account;
    }
}

class AccountJpaDaoImpl implements AccountDao {
    int findAccount(int accountNo) {
        // jpa code
        return account;
    }
}
```
